

ICAM Investigations

Using the **I**ncident, **C**ause **A**nalysis **M**ethod, ICAM International can conduct or assist you in investigations of accidents, incidents and near misses.

We apply nearly two decades of investigation experience and broad industry knowledge to ensure that your organisation benefits from best-practice organisational health, safety and systems management.

The objective of any investigation is to identify and analyse all contributing factors to incidents.

We then provide recommendations for remedial actions to prevent recurrence, reduce risk, and improve HSE performance.

OUR SERVICES

- ◆ ICAM investigations
- ◆ ICAM operational impact investigations
- ◆ Independent investigation quality review
- ◆ Investigation facilitation
- ◆ Investigation coaching
- ◆ Corrective action development
